

## Falcon Cam

Peregrine falcons have been nesting at the library since 2004. They occupy the nest (scrape) from March until June each year. There is an **Evanston Peregrine Falcon Watch** group for posting and sharing news and observations of the Evanston Peregrine Falcons. Scientists from the Field Museum's **Chicago Peregrine Program** band the young falcons each year.

Fay feeds 3 chicks

## More on Peregrine Falcons

**For the latest in breaking peregrine research:**

**[The Peregrine Fund World Center for Birds of Prey](#)**

Has photos, an online research library and newsletter about peregrines and other raptors.

**[Peregrine Falcons- U.S. Fish & Wildlife Service](#)**

Brief facts about the peregrine.

**[The Canadian Peregrine Foundation](#)**

Has a raptor photo identification gallery, live webcams, and a reference page on peregrine biology.

**[The Raptor Center](#)**

Sponsored by the University of Minnesota's College of Veterinary Medicine, this site has information about what to do with an injured raptor, a section on the birds the center has treated, reports on peregrine falcons, and migration tracking maps. Users can view pictures and movies, and listen to individual bird sounds.
