Mind Games 2
The Science of Curious Thinking
Presenter: William Pack

Tuesday, August 10, 2021
2:00 p.m. - 3:00 p.m.

Packed with interactive games, William Pack returns with a second edition of his popular MIND GAMES program. In this program, he reinforces the concepts in MIND GAMES (but you didn't need to see the original Mind Games to understand) and adds even more ways our brain is hard wired to believe things that defy logic and facts. Humans are pattern-seeking animals. Our species' survival depends on finding patterns, good and bad. But sometimes our brains get a little too enthusiastic, putting meaning where there is none and causing us to believe in conspiracy theories, superstitions, and the supernatural. He'll show you how our brains seek out patterns and try to make meaning out of nothing. Join us in this mind blowing presentation. As always, William will reveal the scientifically proven ways to preserve brain health.
